

Annotated orthogroups in the fixed xylem programme

A Gene mapping

B Class

C Descriptive functional annotation

xylem cysteine peptidase 1; xylem cysteine peptidase 2

UDP-D-glucuronate carboxy-lyase-like protein; UDP-XYL synthase 5; UDP-...

FASCICLIN-like arabinogalactan-protein 11; FASCICLIN-like...

UDP-glucose 6-dehydrogenase family protein; UDP-glucose dehydrogenase;...

Bifunctional inhibitor/lipid-transfer protein/seed storage 2S albumin...

arabinogalactan protein 12; arabinogalactan protein 13; arabinogalactan...

Disease resistance-responsive (dirigent-like protein) family protein

NAD(P)-binding Rossmann-fold superfamily protein; NmrA-like negative...

Annotated subset only; descriptions are non-causal and do not establish paralog replacement.

6/8 annotated orthogroups map in all three validation species
